

It's not about
turning on the lights.

It's about creating a space
you call home.

We're your energy company: Alliant Energy. Although you won't be working with us directly – you'll pay your bill through your landlord – we still wanted to say hello.

About us

At Alliant Energy, our purpose is to serve customers and build strong communities.

12 wind farms

43,900 miles of electric lines

1,000+ community and nonprofit partnerships each year

Save energy, money – and the planet

You pay for energy based on how much you use. Small changes can make a big difference.

1. Use LED light bulbs instead of incandescent bulbs. You could save as much as \$75 a year! LEDs last a long time, so don't forget to take them with you when you leave.
2. Buy a smart power strip to automatically power down devices that aren't in use.
3. Lower your thermostat by 10 degrees if you're going out of town for the weekend.

Power outages

They don't happen often. But, if you ever do find yourself in the dark, here's what to know:

- Your meter reports power outages automatically, so you don't have to.
- Check the outage map to see when your power will be back on at alliantenergy.com/outage.
- If you have an emergency, like a downed power line or gas odor, call us at 1-800-255-4268.
