

# Sample building site sketch

12345 Any Street Dr.  
Townville, USA 52999  
Lot 20, Beautiful Acres Phase 3

A detailed site plan should include:

- Sketch of building with lot line dimensions and setbacks.
- Desired Electric and gas meter locations with dimensions from nearest corner.
- Planned or potential deck, patio, swimming pool and unattached garage sites.
- Air-conditioning unit location.
- Septic system, if one is needed; provide copy of septic system plan filed with County and/or State.
- Landscaping features such as berms and terraces.
- The house/fire number and street address, lot number, and name of subdivision.
- Also position meter locations to avoid any conflicts with building openings and sources of ignition. Alliant Energy will make final determination of meter's location based on applicable building, fuel and electrical codes.
