

Energy efficiency programs for businesses

Whether you design a new facility or update an existing building, we have options to maximize your bottom line and generate a significant return on your investment.

Instant Discounts

Save on energy-efficient equipment at the point of purchase.

Energy Audits

Learn how your business uses energy and discover ways to save money.

Custom Rebates

Get cash incentives for qualifying energy-saving projects that don't fit our other programs.

Retro Commissioning

Identify ways to optimize your facility's direct digital controls or process controls and save energy at the same time.

Feasibility Study

This detailed analysis quantifies the benefits of the energy efficiency upgrades recommended in an Energy Audit.

Commercial New Construction

Get free energy design assistance and financial incentives for your commercial new construction project in partnership with your project's architect or engineering design team.

Industrial New Construction

Get free energy design assistance and financial incentives for your industrial new construction project in partnership with your project's architect or engineering design team.

Energy Analytics

This online analytics tool offered through My Account identifies money-saving opportunities and provides customized insights about your specific energy use.

Business Energy Solutions

Work with your local participating contractor to upgrade your lighting and refrigeration systems or tune up your HVAC system.

Ag Solutions

We offer farm energy assessments and custom rebates specifically for agriculture customers.
