TOTAL	100.00%	100.0%	

The 2007 actual power mix shown above represents the resource makeup of renewable electricity (kilowatt-hours) purchased in Alliant Energy's Second Nature program. Alliant Energy's 2007 total electric energy mix contains the following resources: coal (54%), purchased power (39%), natural gas (6%) and other (1%). (Modified: 1/29/2008)

¹ These figures reflect the nameplate kilowatt-hour capacity of the power that we expect to generate and/or have contracted to provide. Actual figures may vary according to resource availability.

² New Renewables are generation facilities in operation on or after January 1, 1997.
